

no more polystyrene foam.

Styrofoam™

your take-out is getting a makeover! In an effort to keep our beaches, parks and storm drains free of polystyrene foam, the City of Alameda has passed an ordinance to eliminate the use of this unsustainable packaging for “take-out.”

reduce your trash at home **CHECK CAREFULLY:** many to-go containers are recyclable or compostable. Rinse your plastics , foil or aluminum containers, and put them in the **BLUE RECYCLING CART**. Paper containers, napkins and leftovers go in the **GREEN ORGANICS CART**. Anything else -plastic wrap, straws, ketchup packets- should be put in the **TRASH**.

When everyone work's together, we keep our island beautiful!

Consider buying a reusable coffee mug.
It saves you money and reduces waste.

take care of your take-out!
